CREATIVE  
MARKETING,  
FASTER.

While losers hesitate, you start!  
Even if you are still working on your idea, it is important that you put something out there so people can express their interest, maybe even sign up to a waiting list.  
You need early adopters for feedback and testing.

With this package, we help you to make the first steps to the online world.

Your own website will get stunning license-free pictures (and of course pictures about your products, services, shop, etc.).

Our photographer is also available (this is not part of this offer). Videos, text, and other content (provided by you) will also be part of the website.

For: £300, within 2-5 working days, you will get:

- 1 Domain name (subject to availability)
- 1 year hosting
- Professional email settings
- Fully functional, fast website
- Automated contact form
- Map of your shop
- Social media links.

# STARTER

“Old website works just fine!” Do you know who says that? People who don't really care about trends and user habits, which would be fine unless the world wasn't full of new competitors, pretty and fast websites, easy navigation and so many smart functions taking over cyberspace.

Every day we are working with data about user habits, how visitors are interacting with websites, and how little patience they have. Pictures are not loading, functions are not working, too much text, too little information...etc. Our company focuses not only on the latest trends but build websites with speed, security, integration, monitoring, automation, and cost-efficiency in mind.

With this package, we will reimagine your existing website, and it's going to be not just prettier, but so much more. You can keep everything you really need but we make your online presence better in every way. We will fix the errors in the code (where it's feasible), update, or change all the built-in functions. Your website's address stays the same, but it will feel super-trendy and it will work for you and your visitors as it should be.

For: £500, within 3-7 working days, you will get:

- Complete or partial redesign
- Database restructuring
- Email re-settings
- Optimised Social media links
- Branding templates for content marketing
- Meta tags optimization
- SEO (Search Engine Optimisation) supporting adjustments
- 1 year hosting

# UPDATER

So you need more than just a website. You need functions, automation, or something more advanced than a webpage? Fantastic.

We love exciting new challenges, and very happy to build and support your business in the digital space.

We do this in 3 steps:

1. We help you to evaluate and crystalize your business idea, and advise you on research, business plan, funding, competition, branding, and other relevant questions. We do this consultation in order to turn your business idea into a real solution, with technical specifications.

2. We break down your great vision into technical pieces to clarify engineering needs. We create design plans, mockups, demos, and finally a timetable for the development.

3. We build the carefully planned website or other software, using the previously agreed elements, connecting with all the prepared social and other integrations.

The pricing and content of this package depend on the specific need, but it includes basic settings. (While we are working on the software, a landing page is collecting data from your future clients.) Extra consultations will be invoiced separately £50/hour

The basic set includes:

- 1 Domain name (subject to availability)
- 1 Year hosting
- Help with custom email settings (spam proofing)
- Fully functional, fast website
- Contact form (automated into the website)
- Map of your shop
- Social media links.

# TAILORED

# SPEED MATTERS!

While losers hesitate, you start!
